ITEM STATUS CODE DETAILS

To simplify your internal pricing update process, we have added an Item Status Code to this price list to help you quickly identify items that have been added, changed, or are in the process of being discontinued since the previous price list publication. The following provides additional detail on what these status codes mean:

► indicates a new item – or any item that has been added since the previous price list printing.

▷ indicates that there has been a price and/or part number change to this item. We recognize that you are continually in a cycle of estimating, specifying, and bidding our products - so we will accommodate price protection at end column price for up to four months beyond the effective date of the price change with appropriate documentation. To qualify for price protection, please provide your regional sales manager with a dated quote document that includes the project name and list of items with quantity prior to the effective date of the price increase.

‡ indicates an item that is in the process of being discontinued. Our goal is to provide our dealers with at least 90 days notice when an item is going to be discontinued to allow sufficient time for dealers to make substitutions in pending system designs and to notify their customers.
